BEEFMASTERS

*Breeding Productive  
Profitable Cattle*

**Mike & Rhonda Collier**

## Welcome to the Collier Farms Advantage Sale !

Please accept our invitation to the **2013 Advantage Sale** to be held Saturday, April 13, in Giddings, Texas. On behalf of all of the Advantage program producers I would like to thank you for your interest in our BEEFMASTER cattle offering.

We consider it a great privilege to be stewards of BEEFMASTER cattle and hope you do too! It is important to note that the Beefmaster breed is the only one in America that was developed for **six economically important traits**. BEEFMASTERS were bred to be versatile and perform in all types of environments. This year we have **Advantage** Producers from as far east as Georgia and Tennessee to arid south and west Texas and humid regions like east Texas and the Gulf Coast. Wherever you may hang your spurs, BEEFMASTER cattle thrive.

The only thing I know of that will rival the versatility of BEEFMASTER cattle is the **integrity** of our breeders. As I have said before, the cattle business is a people business. We enjoy our relationships with our customers and working as a team to improve our breed. I appreciate all of our Advantage Producers being customer oriented and committing to sell only their best!

**Ranch Manager  
Trey & Mona Scherer**

You are welcome to come early on Friday, as the cattle will be available all day for viewing, as well as Saturday before the sale. As is customary, the majority of the cattle will be sorted into small groups and located in outdoors traps so that our customers can get a better look at the cattle and their dispositions. Please join us Friday night for dinner on the ranch at the "Homestead Division" Sale facility near Giddings. We are sincerely looking forward to having you as our guest and know you will enjoy the fellowship of friends and opportunity to view great BEEFMASTER cattle.

Sincerely,  
Mike Collier and the Collier Farms Team

# Maternal Reference

## \*\*Penelope and Petunia

Sire: \*\*Painted Tiger (\*\*Painted Warrior x \*\*CD 1-126)

Dam: Lady Victoria (\*\*Spartacus x Victoria's Secret)

Brought back together into the Collier Farms ET program, flush-mates Penelope and Petunia exemplify everything to be expected from Painted Tiger and Lady Victoria. Combining Painted Tiger with the legendary 293 cow family is a proven mating that has created some of the most impressive and productive cattle in the breed. They have produced several high selling offspring by a variety of sires and the potential to mate well with countless others. Study the length of body, depth, thickness and great fronts they put on their calves. Dams of Vision and Lot 33.

## \*\*Bengal Baby

Sire: \*\*Painted Tiger (\*\*Painted Warrior x \*\*CD 1-126)

Dam: Cathy's Treasure (\*\*Infinity x \*\*Cathy Lee)

Even amongst an impressive set of high caliber females, Bengal Baby has redefined the level of excellence for which all other donors within the Collier Farms herd will be measured. At a very young age, this feminine, yet powerful matriarch has produced some of the best donor and herd sire prospects available on the market and continues to impress with each new set of calves. Females like Bengal Baby will not only be the future of this program, but the coming direction of the breed. Dam of Lots 55 and 72A.

## \*\*Lady Legacy

Sire: \*\*Sir Kiffer (\*\*Cherokee Phantom USA x \*\*Adair 062/7)

Dam: Moss 235/10 (\*\*Levi x \*\*Moss 111/5)

Lady Legacy is the caliber of female rarely found in donor herds due to the completeness she offers. Her straight lines and correctness were complimented by her overall depth, volume, and smoothness. Because of her phenotypic attributes, she easily classified U 1,2 and then received Typesetter status by age seven based on natural progeny alone. Lady Legacy has become a legend at Collier Farms producing both herd sires such as Logan's Legacy and El Nino as well as countless females that have gone on to be donor females in their own right. Dam of Lots 1A&B and 46.

Daughter of Clementine pictured.

## Clementine

Sire: \*\*Cavalier (\*\*Spartacus x \*\*Lazy M 1-5/5)

Dam: Sierra (\*\*Synergy x \*\*Farrah Lady)

One of the cornerstones of the Collier Farms donor herd is the highly proven female, Clementine. This tremendous individual began her reign as a top producer for the Homestead during their peak and continues to crank out the consistency demanded by progressive seed-stock programs. She has been mated to many of the breed's most noted herd sires and inevitably brings out the genetic best those bulls have to offer. Her roots run deep in the 293 cow family line and her offspring are certain to continue the legacy as well. Dam of Lots 2A,B,C & D.

# Maternal Reference

## **\*\*Tiger Whisper**

**Sire:** \*\*Painted Tiger (\*\*Painted Warrior x \*\*CD 1-126)

**Dam:** Dos Sombreros 19/7 (\*\*Spartacus x \*\*Lady Jacqueline)

Like many of the Painted Tiger donors found within the Collier Farms program, Tiger Whisper possesses the long flowing lines, clean front and thick rear quarter essential to true donor females. Through her production, it is evident that Tiger Whisper will consistently produce the gorgeous feminine females purebred breeders desire and strong hardy herd bulls the commercial industry demands. This impressive donor female continues her legacy of production by mating well with some of the breeds top herd sires like Logan and Classic Cotton. Dam of Lots 31A & B and 72B.

## **\*\*\*Dusty Cotton**

**Sire:** \*\*\*Classic Cotton (\*\*Levi x \*\*\*McGrede 5/93)

**Dam:** Miss Dusty (\*\*Painted Tiger x \*\*Lady Jacqueline)

With breed legends like Classic Cotton, Painted Tiger and Lady Jacqueline, this donor female was sure to be a top producer and she has never let us down. Dusty Cotton provides great lines, a long stretch and impressive design to her offspring while maintaining performance and muscling attributes. This highly productive female produces large numbers of high quality embryos which in turn have become some of the most attractive cattle at Collier Farms. Dam of Lot 47, Grand-Dam of Lot 71.

## **Tiger Joy**

**Sire:** \*\*Painted Tiger (\*\*Painted Warrior x \*\*CD 1-126)

**Dam:** \*\*Lightning 800 (\*\*King Cotton x \*\*Lightning 511)

Arguably one of the most prolific and profitable donors within the Collier Farms breeding program is Tiger Joy. Now deceased, this perfectly designed, moderate framed cow produced both live calves and an abundance of embryos up to the age of 16 years. She was known for her ability to produce dark red individuals with ample bone, bladed underlines and beautiful teat structure. Some of her daughters are now donors within the Collier Farms herd, where they will continue the legacy of Tiger Joy. Dam of Lot 56, Grand-Dam of Lot 5.

## **\*Denim Phantom**

**Sire:** MacLaughlin 48/5 (\*\*Levi x MacLaughlin 9/9)

**Dam:** AW 25/6 (JP3 28/2 x Fisher 2/12)

Denim Phantom is a super deep made cow with extra rib capacity, a thick square rear and beautifully extended front end. This cow was brought into the donor herd based solely on proven production. Good udders, bladed underlines and easy fleshing ability are evident in her progeny. One of the most impressive herd sires produced at Collier Farms is a son of Denim Phantom. Be watching for more to come from this great cow line. Dam of Lot 61.

## **\*\*King's Lady**

**Sire:** Adair 385/5 (\*\*S.O.B. x Queen Cotton)

**Dam:** Wittenburg 4301 (\*\*King Cotton x \*\*Brushy Creek 8-269)

When Collier Farms began selecting donors for its embryo program, one of the first cows selected from within the ranks of highly proven brood cows was King's Lady. This extremely versatile cow has proven time and again that she can mate with the breed greats to produce beautiful females as well as powerhouse herd bulls demanded by today's beef industry. At the age of 16 years, King's Lady continues to produce good numbers of high quality embryos in addition to raising her own heavy weaning natural calves on a perfect udder. She is fertility, stayability and productivity at its best. Dam of CF Sugar King and Lots 30A, B, & C.

## **Infinite Oasis**

**Sire:** Captain Lucey (\*\*Infinity x \*\*Milk & Honey)

**Dam:** \*\*Oasis (\*\*Cavalier x \*\*Sex Life)

One of the most classically designed females currently making a name within the Collier Farms' embryo program is Infinite Oasis. As her name implies, her lines are forever flowing, forming a naturally beautiful female that causes one to envision the endless mating possibilities present in this upcoming young queen. Infinite Oasis possesses highly proven maternal linages like 293 and 6/2 which verify her ability to produce the kind of elite Beefmaster genetics needed to take any program well into the future of the industry. Dam of Lots 4 and 57.

## Collier Farms Advantage Program

The **Collier Farms Advantage Program** is a simple yet exciting new customer dedication program designed to enhance the potential marketing opportunities for breeders using Collier Farms genetics. The program will feature exclusive sales opportunities like the Advantage Sale, buy-back offers, cooperative performance testing through bull development programs and gain tests, as well as marketing assistance and genetic promotion of Collier Farms based cattle.

The central focus of the program is to assist Beefmaster breeders in the endeavor of realizing the true potential of their product. Because we at Collier Farms understand the many production and marketing challenges facing producers of all sizes, this program was created to provide a variety of marketing avenues, cattle development options and product support essential to profitability and overall success.

The underlying beauty behind the **Collier Farms Advantage**

**Program** is its simplicity and ease of use. From the beginning, NO exclusive participation levels or highly regulatory mandates were created. It is as basic as implementing ANY Collier Farms bred animal into your program. Simply put, any animal a breeder produces from a Collier Farms bred sire or dam qualifies for the Advantage Program. All calves from Collier Farms bulls, cows, semen or embryos have met the essential requirements of the program. There are NO membership fees or hidden costs.

Once a breeder has a qualified animal there are no limits or restrictions as to when, where or how they choose to market THEIR product. The **Advantage Program** only offers additional avenues or options in which breeders can take ADVANTAGE. Currently, producers can place bull calves in the Collier Farms performance gain test and sale, make plans to reserve a place in the upcoming Advantage Female Sales, or inquire about the buy-back offers available.

Reference page 60 for more information about the Advantage Program.

**CONSULTING & MARKETING**

Dear Beefmaster Breeder,

Collier Farms Advantage Program is your open invitation to get involved with their superior breeding program and marketing plan. The continuation of this successful program will be offered in the Collier Farms Beefmasters Advantage Sale to be held April 13th at the Homestead Ranch Sale Facility in Giddings Texas.

Collier Farms has built a reputation for breeding productive and profitable Beefmaster and established a superior tradition of marketing that same product. Collier Farms breeding program philosophy of producing a Beefmaster product that works for anyone in any environment has established them as an annual source for superior Beefmaster seedstock. With that accomplishment and a never ending pursuit of quality the Collier Farms Advantage Sale represents your opportunity to purchase and produce a better Beefmaster and get involved in an established successful marketplace.

Logan, Vision, Fusion, New Dimension, Tabasco, Painted Tiger, Cavalier, CF Sugar Britches are represented in this impressive sale offering of superior individuals with the extra quality and predictability you require for true breeding success. Combine this with the maternal strength of Oasis, Clementine, Lady Legacy, Kings Lady, Infinite Oasis, Harmony, Dusty Cotton, Bengal Baby, Tiger Joy and more that exhibit the extra predictability you need for superior consistent production and it is no surprise that this sale offering has the depth of quality individuals that makes breeding a better beefmaster attainable. We have tremendous individuals in every category exhibiting the breed character and performance you desire that give you the tools to create your own successful Beefmaster business. The Advantage consignors have matched the quality of Collier Farms and with the youth represented throughout this sale offering this is an event you must attend to fully appreciate.

Collier Farms and the Advantage consignors are built around the guarantee of your satisfaction and they have done their job to gather the proper product for you to be profitable. Now it is up to you to get involved with the Collier Farms Advantage Sale. We ask that you make plans now to join us Friday to evaluate the sale offering in the traps and enjoy a tremendous supper.

If you have any questions or need any assistance of any kind do not hesitate to contact myself, co-sale manager Anthony Mihalski, sale consultant Mike Green or Collier Farms. We all stand at the ready to help you become profitable in your Beefmaster breeding program with your purchase at the Collier Farms Beefmaster Advantage Sale.

See you in Giddings!  
Bruce Robbins

Dear Beefmaster Breeders & Friends,

I want to personally invite and welcome you to the Collier Farms Advantage Sale on April 13, 2013 for a true seedstock offering of Beefmaster cattle.

Collier Farms and the Advantage Program Breeders have built their herds around tried, measured, and proven cattle with the very best genetics in the industry!

After many years of dedicated work and selective breeding, utilizing all the best herd improvement tools available, identifying and then producing the top herd sires of the breed with the elite females of the breed. We are confident in the sale offering of "Only the Best"! The cattle offered in this sale are bred to make your program successful with productive, profitable cattle with emphasis on longevity which increases profitability.

The sale offering will include Herd Sire Prospects, Pairs, Bred and Open Heifers, Semen and Embryos. You can view all the sale cattle beginning on Friday afternoon and join us for dinner on Friday evening.

Take advantage of this program and sale. This program is based on honesty and integrity with a no-question asked guarantee. I look forward to seeing you there. If I or any of the sale team can help you, please give us a call.

Sincerely,  
Anthony Mihalski

TERMS AND CONDITIONS OF SALE  
ADOPTED BY BEEFMASTER BREEDERS UNITED  
FOR BBU APPROVED SALES

Effective September 10, 2010

THE FOLLOWING TERMS ARE APPLICABLE TO ALL TRANSACTIONS IN BBU APPROVED SALES:

1. **BIDDING:** Each animal will be sold to the highest bidder without reserve.
2. **BIDDING DISPUTE:** The Auctioneer in charge will settle any dispute as to bids, and his decision on such matters shall be final.
3. **TERMS:** Terms of the sale are cash due upon sale, unless prior credit arrangements for the sale have been agreed upon in writing between the Buyer and Seller, in which event, the terms of the written credit arrangement between the Buyer and Seller for the sale shall prevail. The failure of a member buyer to pay the appropriate party the sale amounts when due may constitute a cause for exclusion from BBU pursuant to Article I, section 9 of the By Laws of BBU.
4. **PURCHASER'S RISK:** Each animal becomes the risk of the purchaser as soon as the auctioneer declares it sold.
5. **CERTIFICATE OF BREEDING AND/OR TRANSFERS:** All required paperwork will be transferred to the buyer at the seller's expense, upon settlement.
6. **HEALTH:** All animals will have appropriate certificates of veterinary inspection for travel to the sale site and will to the best of the seller's knowledge be eligible for interstate shipment, however, buyers need to be aware of their individual resident state's requirements for shipment of cattle. Any and all testing will have been completed within thirty (30) days of the sale date.
7. **ANNOUNCEMENTS:** Any changes in information of any kind will be announced from the auction box and such announcements shall take precedence.
8. **BREEDING GUARANTEES:** a) **FEMALES: OPEN AND/OR EXPOSED FEMALES:** Females younger than twenty-four (24) months of age can be sold as open. Open females are so guaranteed. Any female is considered a breeder if she is certified to be pregnant by a licensed veterinarian at the time of sale and/or has a nursing calf at side. Cows (including donor cows) with calves at side six (6) months or older must be certified to be pregnant by a licensed veterinarian. b) **SAFE IN CALF FEMALES** have been examined by a competent veterinarian and are so guaranteed. c) **BULLS:** Bulls eighteen (18) months or older are guaranteed to have passed a Bull Breeding Soundness Evaluation (BSE) and to have been certified a satisfactory potential breeder by a licensed veterinarian within forty-five (45) days prior to sale date. The results of the Breeding Soundness Evaluation (BSE) must be reported on a fully completed official form and attached to the health papers required for the sale.
9. **DISCLOSURE OF PRIOR PROCEDURES:** If known to the seller, there must be a disclosure in the current sale catalog or from the box of any circumcision or other surgical alteration of any underline of any male or female and of any single egg or super-ovulation flush of any female sold in a BBU Approved Sale.
10. **INHERITED DEFORMITIES GUARANTEE:** All bred females are guaranteed not to produce a calf with an inherited deformity occurring in Bovine for a period of nine months following date of sale.
11. **REPRESENTATIONS AND GUARANTEES:** All representations and guarantees, whether set forth in sale catalogs, these Terms and Conditions of Sale or otherwise, are solely those of seller and are not those of BBU. Except for the assurances set forth in the Approved Sales Agreement that an animal does not exhibit a genetic defect and that its registry information is consistent with the information in BBU's records, BBU makes no representations, warranties, guaranties or assurances whatsoever.
12. **RIGHTS AND OBLIGATIONS:** The above terms and conditions of sale shall constitute a contract between buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction. Neither BBU, the sale manager, nor any other person connected with the management of the sales assumes any liability, legal or otherwise, for any subsequent resale of an animal.
13. **REMEDIES:** a) **OPEN AND/OR EXPOSED FEMALES** are guaranteed to be breeders by twenty-four (24) months of age except in cases of animals purchased and then fitted for show or administered any super ovulation drug. In cases of animals fitted for show or administered any super ovulation drug after purchase, the breeding guarantees, if any, shall be such as agreed upon between buyer and seller. All claims for a refund must be made in writing to the seller within six (6) months after the animal reaches twenty-four (24) months of age. Open females are so guaranteed. If within sixty (60) days after the sale date, a female sold as "open" proves to be with calf, the buyer may return the to the farm of the seller, provided the female is in good condition and in compliance with the health requirements of the seller's state, and receive refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The buyer's failure to notify the seller within sixty (60) days from the date of sale and to make the election as hereinabove provided shall relieve and absolve the seller of any duty, obligation or liability to the buyer regarding the purchase of said female. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. b) **SAFE IN CALF FEMALES** are guaranteed to have been examined by a licensed veterinarian. If within thirty (30) days after sale date, a female sold as "safe in calf" proves not to be in calf, the buyer may immediately request that the female receive service from the bull previously used, if available, or return the female to the farm of the seller, provided the female is in good condition and in compliance with the health requirements of the seller's state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The buyer's failure to notify the seller within thirty (30) days from the sale date and to make the election as hereinabove provided shall relieve and absolve the seller of any duty, obligation or liability to the buyer regarding the purchase of said female. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. c) **FLUSHES AND TIME REQUIREMENTS:** A flush consists of all viable embryos, transferred or frozen, received from a female as the result of the administration of any super ovulation drug. The sale of a flush or resulting pregnancies must specify in the sale catalog the number of pregnancies guaranteed and the disposition of any other pregnancies resulting from the flush, the disposition of any frozen embryos resulting from the flush and any additional charge for the recipient cows. The maximum time for the delivery of the guaranteed results must be specified along with a payment schedule. Non-delivery or only partial delivery by the specified time by the seller will result in a pro-rata refund of all monies paid by the buyer for such flush or pregnancies not delivered. d) **PREGNANCY AND/OR PREGNANT RECIPIENT COW:** Pregnancy and/or pregnant recipient cow is a cow of any breed that is carrying a pregnancy (guaranteed to have been examined by a licensed veterinarian as safe in calf) as the result of a flush as so stated on the certification of embryo transplant form. Such pregnancy and/or pregnant recipient cow is guaranteed to be carrying the embryo pregnancy so stated and if found not safe in calf by a licensed veterinarian within thirty (30) days of delivery of the recipient cow to the buyer, the buyer will have the same remedies as set forth in clause b) for the safe in calf females. The amount bid by the buyer for the individual pregnancy and/or pregnant recipient cow offered at a sale will be inclusive of the recipient cow. A pregnancy and/or pregnant recipient cow should be available at the sale site; however, if not available it must be delivered to the buyer, at the seller's expense, within thirty (30) days of the sale with the necessary health papers sufficient for delivery to the buyer. e) **CLONES:** Only BBU replication cell-cloned animals shall be eligible for registration and eligible to sell in BBU Voluntary Approved Sales. Genetically modified animals shall not be eligible for registration and cannot sell in BBU Approved Sales. Cloned animals shall be guaranteed by the seller to be breeders under the same terms of the agreement for females and bulls. Any additional guarantees with respect to clones shall be by separate agreement between buyer and seller. f) **BULLS:** If within one-hundred twenty (120) days from the date of sale, the bull has failed to pass a Breeding Soundness Evaluation ("BSE") certified by a licensed veterinarian, buyer must send seller written notification of the failure of the test within one-hundred and twenty (120) days from the date of sale and include the BSE test results. Within sixty (60) days after seller's notification of the failed BSE test, buyer and seller shall identify a mutually agreeable licensed veterinarian or technician certified by a licensed veterinarian to perform another BSE on the bull at the buyer's expense. The results of the test shall be deemed final and conclusive of this matter and binding on buyer and seller. If, in the opinion of said veterinarian or technician, the bull is unable to pass a BSE and be confirmed a satisfactory potential breeder, he shall so certify in writing to the seller and the buyer which shall include the official form used by the Society of Theriogenology or the official BBU Breeding Soundness Evaluation form. In such event the buyer may return the bull to the farm of seller, provided the bull is in good condition and in compliance with the health requirements of the seller's state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. A listing of industry standards for Scrotal Circumferences for bulls at various ages will be printed in the sale catalog. Satellites, Marketing Groups, or individuals may specify additional guarantees.

**Beefmaster  
Breeder  
United**

**Voluntary Classification Guidelines:**

Cattle are visually inspected by a BBU field representative for desirable traits. Each animal is classified according to BBU's Standards of Excellence.

Any bull or female in the "U" category will be so designated on the BBU Certificate of Breeding along with the date and initials of the BBU field representative. To be presented for a "U" classification, males and female must be a minimum of 8 months with no upper age limit. Classification of Certified Beefmaster cattle is \$5.00 per head or \$350.00 per stop, whichever is greater.

Any bull or female in the "X" category will be removed from the registry by BBU's office and so noted by correspondence to the member. BBU will not charge the member a classification fee for an "X" animal.

Bulls must have a yearling scrotal measurement (taken between 320-410 days of age) of at least 30 cm to meet the "U" qualification. A measurement of 34 cm is the objective.

All cattle presented for classification must have permanent identification and must be certified or an application for certification must be presented to the field representative.

To receive a number score all animals must have a "U" classification.

All animals (male and female) aged 13 months and up may be presented for "U" classification and number scores for conformation and underline, with the stipulation that if the animal is seen later in a BBU Approved or Sanctioned Sale it is subject to reclassification by the BBU field service representative at the sale (at no charge).

**Scrotal Circumference Scores:**

SCORE	AGE		
	15-20 Mo. Old	21-30 Mo. Old	Over 30 Mo. Old
Very Good	More than 37 cm.	More than 39 cm.	More than 40 cm.
Good	31-37 cm.	32-39 cm.	33-40 cm.
Poor	Less than 31 cm.	Less than 32 cm.	Less than 33 cm.

**BBU's Mission is to enhance breeder's ability to raise and promote cattle based upon the founding "Six Essentials:"  
Disposition, Fertility, Weight, Conformation,  
Hardiness, Milk Production.**

Painted Tiger and Clementine have teamed up again to produce this outstanding pick of flushmate embryo heifers. Study the consistency of quality in each individual female. Even though they are all very complete and balanced, each heifer exhibits a little different style than the others making for a very difficult pick. The A lot is super deep bodied and very correct on her feet and legs. She would really enhance a super clean-lined bull that needs a little extra power.

Super fancy would just begin to touch on this impressive female. Look at the long extended front, long flat hip, and strong hock exhibited in this doll. Collier Farms is currently flushing 2 full sisters of this very mating with high embryo production levels resulting in large numbers of top quality progeny. CF 176/2 is a future donor in the making. Take her home and breed her any way you want to prove up your next herd sire prospect.

CF 201/2 is just as classy as her other sisters, and solid red for an extra bonus. Look at the body depth and maternal characteristics exhibited in this flashy female. She has the genetic consistency to work a number of ways, but at Collier Farms, Logan would be a sure bet every time.

Just like her sisters this little Tiger is just as soggy and just as complete. Everyone tries to find the sleeper heifer in the pick, and this just may be her. When you really get down to studying this female, she is hard to fault. By the way, study up on her performance numbers, 655 lb. 205WW with a ratio of 120, 67 lb. birth weight with a ratio of 112 and the best scan data of the group with a 1.38 REA/swt is hard to beat.

Of all the great cattle currently active in the breed, two of the top individuals that are unarguably making the most permanent mark on Beefmasters are Logan and Oasis. The mating of these two living legends was inevitable, and now you have the rare opportunity to own one. The lot 3A heifer is a very balanced and clean-lined female that is sure to be the kind of donor that will add the power of Logan and style of Oasis to her progeny.

Even as a weaning age female, the thickness and power of Cf 570 was evident. Like her other two sisters this classy package has the style and cut you expect from these top tier genetics, but the additional muscling and power demanded in today's beef industry. She boasts solid performance numbers and outstanding EPD's.

Just as impressive an individual as A & B, the C heifer of this pick may be the most feminine fronted and maternal looking of the group. Cf 574 has that soft sweet style that cattlemen associate with a real mama cow kind. When this flashy girl fills out and starts to spring with that first calf, all doubts will be removed as to how valuable this asset truly is.

It just wouldn't be complete unless a top herd sire prospect was thrown into the mix of this one of kind pick of flushmate siblings. If you are the kind of cowman that gets more excited about a herd bull than a donor female, then here is the lot you need. Study the bone, muscle, hock, and overall power of this young bull that is less than a year of age. Then consider how high other Logan or Oasis sons have been selling for in sales like Live Oak or the Collier Farms bull sales. Don't wait until next bull season to realize you need a young herd bull. Here is the calf to build a program around.

Lady Legacy lives on in this impressive pick of flushmate Vision daughters. Solid dark red, deep bodied, and extra classy just begin to touch on the attributes exhibited by these individuals. When Vision is added to the mix we see the extra power and rib shape evident by their strong ultrasound scans and visual appraisal. This is a very exclusive opportunity as this is the only Vision x Lady Legacy mating that will ever be produced. Here is a real once in a lifetime offering.

As is true of most legendary females, breeders will look back and search for ways to include the Lady Legacy cow family into their program. These two fancy females represent the chance to put those first line genetics into your program. Because they are the only two individuals representing this mating, don't wait on the chance to buy the second heifer, she probably won't sell!

One of the newest semen sires to hit the main stage of the Beefmaster world is a powerhouse called New Dimension. This easy fleshing, stylish female is one of the first ET daughters by New Dimension and out of the gorgeous donor female Infinite Oasis. Study the showy front end, thick and square hindquarters, and overall clean lines easily visible in CF 289/2. This heifer has the numbers to back her up as well with strong individual performance, big EPD's, and huge ultrasound numbers like at 1.27 REA/swt and 3.91 IMF.

Its easy to produce the kind of quality and consistency needed in the beef industry when you take proven productive genetics like Logan, Fusion, and Tiger Joy and blend them together to get that guaranteed mix of both performance and style. This dark red female exemplifies what makes good genetics great. She is super easy fleshing, ultra-correct, heavy-boned, yet clean and very docile. Don't overlook her excellent scan data and individual performance as well.

Vision and Lady Prada hit it out of the park with this feminine little chunk. Over and over, we hear the call for more muscling, easier fleshing, and more efficient cattle. We all know it sounds simple, but putting together a total package that meets these demands is difficult to do, unless you have a heifer like this in your program. Crystal Vision makes upgrading your herd's genetics a perfectly clear decision. Where else are you going to find muscling, color, pedigree, performance, and an underline like this? Just look at her massive carcass numbers.

Vision, Tabasco, Synergy, just begin to hit at the heart of the genetics offered in this gorgeous young female. Barely a yearling past, this heifer is already exhibiting the characteristics of a high quality seed-stock animal. She has the conformational design, clean lines, and attractive red coloring we all want in our Beefmaster genetics today. This heifer is very complete from her performance to her pedigree, she has it all. Stud the high IMF of 3.89 and REA of 9.23 inches.

Logan Heart exemplifies what makes Logan genetic so valuable in a breeding program. They consistently produce uniform cattle that are a grade above both themselves and the females they are mated with. This eleven month old beauty queen is super deep and soggy, yet feminine and balanced in her design. She brings in the legendary maternal genetics of Sugar Ann and King's Lady. She additionally delivers a big 205 WW and impressive scan data.

Vision on Fusion is a guaranteed cross every time and this doll is just another example of the kind of quality we've come to expect from both highly proven lines. Study the heifer, her individual growth performance, scan data, and solid EPDs. She had a huge IMF of over 4% and still maintained a large ribeye size of 1.25 REA/cwt.

Finding high quality POLLED genetics can be a challenge, but this attractive young heifer delivers just that. Study the femininity of her overall structure while still maintaining ample muscling and fleshing ease. Proof of this is her big REA and high IMF. She also brings in the lines of Totally Sugar and Jungle Spice giving Simply Sweet a little sugar and spice.

Logan on Painted Tiger bred females is a sure bet every time and this solid red class act is just another example of that. 12P7 is very long and stretchy and just now coming into her own as a young herd building mama cow. She also boasts big numbers with a 4 % IMF and 10.46 REA. This is a very complete individual.

Take note of this dark red, extra fancy fronted, POLLED darling. 007 and Alice on top worked extremely well with this Innovator daughter. Alice was a proven brood cow and donor in the Collier Farms herd up to 14 years of age, and was the kind that would out-milk every cow in the pasture. 7/12 has strong EPD's and great scan data to complement her phenotypic and genetic qualities.

Here is another big stout solid red heifer out of the 007 and Alice son Skinner's Rafter S bred to some of their top brood cows. Alice brings in the maternal characteristics wanted in your cow herd and 007 adds to the performance needed to be profitable. This heifer was scurred POLLED and maintains some solid scan data with a 3.84 IMF and high fat measure ratios.

Cavalier daughters are like quality gold jewelry, they are always in style. This powerhouse female is super thick when you get behind her and over her top. Her dam M639 is one of the most productive upcoming young donors in the Collier Farms herd. CF 117/2's granddam, 72L was a highly proven donor as well producing numerous other donor females currently in use throughout the breed.

Cavalier, Infinite Prissy, and Captain Sugar teamed up well to produce this attractive young spring heifer. Just now beginning to bloom, CF 276/2 will be the kind of deep-sided, full-bodied cow Beefmasters breeders love. When you combine color, conformation, and pedigree to the performance of this heifer, you will find one that has it all.

CF 808/2 is proof positive that good cattle reproduce themselves and make for a profitable cattle program. This super fancy Fused Silk daughter is making her second trip to the Advantage sale, as she was a baby at the side of an excellent Maximus daughter purchased by Roadhouse Ranch. It is readily evident that combinations of high powered genetics and performance measured cattle can produce individuals with the style one wants with growth and carcass performance as well.

Here is a super long-bodied female with the extra classy front-end we would expect to find in a double bred Tabasco daughter. RHR 1 brings combines the lines of Fusion, Tabasco, Lady Legacy, and Captain Sugar with strong individual growth performance and big ultrasound scan numbers to produce an attractive individual that would be an asset to any herd.

Here is one fancy heifer we hate to see go. Ava is stacked from top to bottom from a genotypic standpoint. Additionally, she has the high IMF and low birth weights consistent with Fusion and demanded by breeders. Take her home and breed her to the bull of your choice. Lifetime members.

One of the most consistent and productive herd bulls currently active in today's Beefmaster cattle is Totally Tabasco. Just like this easy fleshing, thick made heifer, his calves are born small, grow quickly, scan high, and breed up on time. Look at the EPD's, the perfect scan numbers and perfect conformation of 61/2 and think of the ways she could work for you.

Easily one of the most powerful heifers in this year's offering is this dark red, heavy boned mama cow in the making. Study the length of body, hock and joint structure, and additional muscling found in 1860/2. Her sire is a full brother to one of the highest selling bulls in 2012 and she is extra gentle as well.

If pretty fronts, predictable genetics, and monster scan data get you excited, then here's your lot. Jesse is the only full brother to Logan and when mated with an excellent Tabasco daughter back out of the Mary Kay donor, you know it will be good. Dark red with a huge REA of 1.41 inches per scan weight makes her a must have.

Another way to get the predictable lines of Jezabelle into your herd is by using an attractive young Tiger J daughter like this one. Tiger J paints cattle dark red, makes them moderate in stature, and produces progeny with early fertility. The dam of CF 127/2 was a high placing heifer back at the 2009 Houston futurity and has been a top producer for the Collier program. Don't overlook the 4.25 % IMF.

Starting off this year's fall heifer offering is one of the most complete females of the sale. This solid red doll is not only extra gentle and super fancy, she has huge growth ratios and scan data while bringing in some of the breeds most productive genetics. Both her dam and grand-dam have remained in the herd for over 12 years. Any time you put Lady Legacy and Midas Queen together you have maternal greatness.

Tiger J goes to work again and this time on a Fusion daughter. CF 842/1 is the kind of female serious breeders need to restock their brood cow herds. She has the color, performance, and phenotypic design to build from. Study the scan data, 3.81 IMF and 1.23 REA/swt are very solid.

We dug deep into the heart of the program when we pulled this broody matriarch to be for the sale offering. This is what we are all about. Fusion on Vision's full flushmate sister brings to life some of the more recent matings and genetic direction of the program. When considering the pedigree, phenotype, and performance of this individual, she is hard to pass up. Full sibling embryos to this doll sell as lot 72C.

Logan back on the great Tiger Anna really produced a home run in this solid red, POLLED, young female. This heifer is super correct in her design, perfectly colored, well bred, and scanned beyond belief. Look at the massive REA size of 10 inches and the high IMF of 4.67. When considering she is polled, with big numbers, and proven genetics its hard to pass up this kind of asset.

It was a pretty easy decision to put these three flushmates together and let the buyers decide which was best, because we couldn't. Each heifer brings a little different offering to the table which makes breeding cattle like this an exciting challenge. The A heifer here is super deep and growthy. She is very complete is style and performance as you study her EPD's, scan data, and phenotypic design.

This heifer and her 2 flushmate siblings just begin to tell the story of King's Lady. The amazing cow was selected to be a donor after she had proven for years that she was consistently a top producer in the pasture. Since that time, she has gone on to produce numbers of both high selling bulls and females. Currently she is almost 16 years of age and is still raising natural calves while being flushed as well. Her udder is still perfect and her fertility is unmatched.

Just as with A & B this heifer brings in the lines of both King's Lady and Sugar Britches. Previously we touched on the value of King's Lady, but then consider the greatness Oasis adds to the mix. All three heifers have great conformational attributes coupled with performance and the pedigree breeders want. Now make your pick.

Tiger Whisper has made her mark on the Collier Farms program and has now moved on to greener pastures, but the opportunity to benefit from her legacy lives on in these Classic Cotton daughters. Classic Cotton always worked well with Tiger Whisper, the ¾ sister to Miss Dusty. We have seen over and over that Classic Cotton adds growth performance and REA size to his progeny. Study the clean fronts, great coloring, and proven performance of both A & B.

Just like the A heifer, 860/1 has all the attributes we've come to expect from Classic Cotton and Tiger Whisper. This heifer has extremely high ratios across the chart and the EPD's to back it up. This will probably be your last opportunity to put Tiger Whisper into your breeding program, don't pass up the chance.

Write-up for lot here. Write-up for lot here. Here is a freight train of a female coming from CF Sugar King and a 9112 daughter. Sugar King is a reference sire in the catalog and video and you will see more of this promising young herd sire to come. 9112 was in use at Collier Farms until the age of 10 and produced numerous top ten bulls at Live Oak including the 2008 Reserve Champion. This heifer shows the promise of the future while proving the successes of the past.

We knew it just couldn't be an Advantage sale without giving our friends a chance at some of our best, and Logan on Petunia is a guarantee of that. CF 861/1 takes after siblings that have come before her. She is powerful, yet feminine, packed with pedigree, and bred to perform. This is the kind of female that will go out and prove up some of the more modern young herd bulls in the breed without sacrificing the classic Beefmaster style we love.

CF 950/1 could easily be the most complete individual Collier Farms has sold to date. If you are serious about finding your next donor, look hard at this one. This super powerful female is conformationally correct in every way and has one of the most attractive pedigrees of the offering. What makes this heifer even more valuable than her strong performance and design is that she is from some of the most modern promoted genetics and is proof that we are moving in the right direction as a breed.

Vision just keeps turning out these extra thick, broody females with really cool fronts. That genetic consistency is portrayed again in this Maggie daughter. Maggie is out of Spartacus and the great Painted Tiger daughter Maggie Mae. Solid red in color, clean underlined, and packed with performance just begin to touch on the reasons you should take this heifer home.

Logan on First Morning is a genetic combination replicated time and again at Collier Farms due to the consistency and quality evident in this lot. CF 914/1 is extra class in her type, bred right, performed well and is POLLED. Her grand-sire, Navasota, would commonly produce polled cattle as is First Morning.

One of the most talked about genetic traits in the industry today is carcass merit. As seed stock breeders we must continue to advance our genetics in this area. The only way to do this is to identify cattle like 1-4 that exhibit these traits and implement them into our programs. This amazing individual is at the top of the breed when it comes to scan data. She had a massive REA/swt of 1.47 and unbelievable IMF% of 5.0.

If you like smooth beautiful females, CF 876/1 is hard to beat. This gorgeous, flowing red female is out of our Tiger's Destiny donor and the great Logan. When combining these two genetic masterpieces, we consistently get some of the best cattle produced to date. Both bull and heifer calves from this mating are very high quality, which helps to ensure that you will be pleased with her produce regardless of sex.

We started off the breds with a real sacrifice lot. This tremendous female is a culmination of what Collier Farms has been breeding toward for the last several generations. CF 710/1 is solid red, super clean underlined, extremely thick yet classy fronted, and packed with proven predictable genetics. You can see we stacked Vision on Fusion back on Logan and she is now 4 to 5 months safe in calf to either Fusion or Sugar King. Palpated to the AI date.

Here is the definition of a Beefmaster heifer. Its no secret that we think highly of these females that go back to Silk Stockings at Timber Ridge. They always have tremendous udders with plenty of milk. I don't think there is any exception here. She is bred safe to Fusion on 10/30/12 so you know you have a good coupon coming. Lifetime Member.

Sugar Vision is just another example of how well Vision and Fusion can work together. This big ribbed heifer has lots of body and plenty of muscle. This young fall born heifer was too light bred to call safe at the palpation time so she sells exposed to CF Sugar King.

At Collier Farms, we could write a book about the successes we have had with Logan and Lady Legacy. Full sisters to this stylish heifer have gone on to be donors in both the U.S. and Mexico with great results. This is the very last of Lady Legacy daughters to sell. There will not be more, so add her to your program and write your own chapter of the Lady Legacy story. Palpated 4 to 5 months bred to Fusion on the AI date, and cleaned up with Suger King.

It just wouldn't seem right if we didn't offer one of the many great daughters of our Typesetter/Pacesetter donor, Dusty Cotton. As one of the most proven donors in the Collier ET program, Dusty Cotton continues to impress with progeny like this U 1,2 classified female. Logan and Dusty Cotton produce consistent, hard-working genetics that mate well with a variety of different herd sires. Can we suggest Fusion, Vision, or Suger King? Bred approximately 4 to 5 months at sale time and palpated to the AI date.

Logan on Heavenly Harmony was a guaranteed hit because we know well Logan works on both Penelope, the full sister to Sgt. Pepper, as well as the great Harmony cow. When you find those kinds of consistencies in cattle breeding, you don't experiment, you replicate! This extremely stylish heifer is bred 4 to 5 months and palpated to the AI date.

Study up on this extra fancy Polled Fusion daughter. CF 708/1 combines the genetics of both Fusion and Logan with a little added twist, she's POLLED. Both of her grand-dams are extremely productive females in use at Collier Farms and both are polled, so you have a little extra insurance that she could produce polled genetics as well. Bred safe in calf two months to CF Sugar King.

Here is a classic built Fusion heifer that has a lot of potential. Fused Sugar is just now coming into her own as a young bred female, ready to show the world what she is capable of doing when mated properly. Don't pass up this great female, she is bred 2+ months to CF Sugar King.

Sugar Britches on Cavalier and Maiden Lady is just one of those matings that just had to work. Both lines of cattle are very deep and full-bodied. We see strong consistent EPDs in these kinds of cattle and predictable results. 1931/4 is now a donor in the Collier Farms program where she is beginning to prove she could be one of the greats. This heifer is approximately 4 to 5 months bred and palpated to the AI date.

Take a look at this flashy dark red heifer with just a splash of white on her underline. This attractive female is by The Captain, a full brother to Sugar Britches, Sugar Bear, and Dream Catcher. Here we go again with legendary herd sires Captain Sugar, Cavalier and Painted Tiger mated with matriarchs like Oasis, Carmenett and Sugar Ann. These genetics work and are ready to produce for you. She is bred approximately 4 to 5 months safe to Fusion or Sugar King.

Here is an attractive pick of bred heifers from W-W enterprises that is sure to go out and earn a living producing quality calves with little input. These cattle come from a serious commercial program that doesn't pamper their cattle and demands performance. They are by Fusion II, the only full brother to Fusion, and out of Collier based genetics on bottom. The A lot is bred 3 months safe to CF Sugar King.

This heifer is nearly an exact copy of the A lot. She is solid dark red, hearty, and ready for service. The maternal genetics on bottom run deep in this female going all the way back to CF 093/8, a ranch favorite. 54B was bred too short to call safe at palpation and sells exposed to CF Sugar King.

When asked which of the Collier donors is best, Bengal Baby is definitely on the short list. Study the completeness offered by this donor prospect pair. Not only does the buyer of this lot get a stunning dark red Logan x Bengal Baby daughter, but a solid red Fusion heifer calf as well. Here is the kind of lot that any breeder, new or old, can go out and begin to build a cow family and program around. The only reason she is selling is because we are serious about offering only our best. DNA parent verified cow and calf.

Tiger Joy was one of the donors at Collier Farms that began the rein of Logan on Painted Tiger. This great donor female produced the caliber of progeny that were necessary for the advancement of the program and the breed. Tiger Joy is now deceased and here is the last opportunity to add one of her daughters to your cow herd. In addition, the buyer receives a beautiful show heifer prospect by Fused Silk, which could be better than her dam.

Imagine what your ideal donor female would look like, then stare at CF 338/0 and you will probably find many similarities. Super long, ultra correct, extra feminine, and a proven pedigree are all things that probably come to mind. Logan's Leader was the high selling bull at the inaugural Collier Farms Performance Bull sale and has proven to be a top producer with donor cows such as Infinite Oasis. This beautiful 1st calf cow has a perfect udder and beefy bull calf at side by Fused Silk. CF 338/0 sells open and ready to flush or breed to the bull of your choice.

Logan is at it again and this time it is with a pacesetter 007 daughter CF 701/3. One could drive long and hard before they found an udder which could rival the design of the one under this young cow. If that alone doesn't impress, study the bull calf at side. Heavy boned, solid red, and no underline make this calf a definite herd bull prospect.

Everyone loves Silk Stockings, and this moderate little pasture princess brings in those great maternal lines along with Logan and Fusion. Its hard to go wrong with this kind of package. She ultrasound scanned very well as a heifer and bred up to calve right at 2 years of age. She sells with a Sugar King calf at side.

New Dimension hit the ground running with the first offering of progeny at the 2012 Collier Farms Bull Sale and now the females are ready to show their stuff as well. We are sacrificing this female strictly to prove up New Dimension to the Beefmaster world. She has a perfect front, is moderate in size, ample muscling, and plenty of milk. Her calf was born right before the video and was having a hard time keeping up with her mothering ability. With Logan on bottom and the power of New Dimension on top, this is a must have individual.

We don't often let go of a Fusion daughter, much less one out of Denim Phantom, but in the spirit of the sale, we offer to you this outstanding cow. Fusion daughters are born small, but grow into gorgeous full bodied females that really know how to care for a calf. Just look at this Vision bull prospect at side. He is less than five months old and is showing all sorts of potential.

Tabasco Legacy daughters are always at the top of the offering in Collier Farms sales. His calves excel in growth characteristics, conformational correctness and udder design. Additionally, they are gentle natured and make long lasting, productive mama cows. CF 235/0 goes back to Victor's Sister on bottom and is carrying a polled bull calf baby at side.

Just as Logan does, Jesse does. Consistent, feminine, maternal, and productive just begins to touch on why we keep using and promoting these genetics at Collier Farms. CF 643/1 is out of V-Seven 1262 a 13 year old brood cow that has never missed during her tenure at Collier Farms. That kind of fertility and productivity is the kind we keep in our program and here is the opportunity to add it to yours. She sells with a solid red and possibly POLLED heifer calf at side.

Changing it up just a little, we decided to throw a Mesquite Red daughter into the mix. Obviously, her calf speaks volumes for the kind of maternal abilities present in this lot. Both of her grand-dams, Tiger's Cotton and LF 107, were long time producers and lasted well into their teens. This is the kind of fertility, longevity, and maternal characteristics needed to remain profitable.

Just read down the list and you will quickly understand what makes this female great. Logan, Rancher's Lady, Scarlet's Pride, and Dusty Cotton are all typesetter or pacesetter genetics. This solid red, queen of the cow country, is super deep sided, perfect uddered, and ready to be bred back to the bull of your choice. She sells will a solid red heifer calf at side by our POLLED V7 13/0 bull.

Logan and Lady Legacy on top, back on Lincicum 183-5 on bottom was sure to work. The 183-5 cow was probably one of the longest lasting brood cows we've had in the Collier Farms program. She continued to breed back and raise a top quality calf until she was 16 years of age. With this kind of maternal greatness in her lineage, she is one to pick up and tell stories about at your ranch until she is 16 years old as well.

When looking for the right herd bull, it is important to not only look at where one is currently in their breeding program, but also where they want to be. Do you need to clean up underlines on your cows? Do they need moderation of frame and improved fleshing ease and feed efficiency? Is increased muscling a program goal? CF 650/1 is the type of herd bull that can take a program well into the future of the industry and deliver these kinds of traits without sacrificing breed character and proven pedigrees. On our performance gain test, this bull had a grass test ADG of 3.39, supplement test ADG of 4.96 and REA/cwt of 1.30. Imagine how this kind of bull would improve traditional style

BBU cattle and make that calf crop even more marketable.

Logan on Fusion's full genetic sister was destined to be a great mating and this top end herd bull prospect is an excellent example. 03/1 was from a flush of calves that produced several top quality herd bull prospects as well as extra fancy donor type females. He himself has had very good individual growth performance as evident by his WW and YW. This bull also performed well on gain test boasting an ADG of 2.75 on grass and 3.63 on supplement. Here is a solid red, clean made, herd bull prospect that can go out and reproduce the kind of top tier genetics required by breeders today.

Big strong boned, well-made herd bulls with lots of muscle, solid dark red color and proven pedigrees are not easy to find. Lucky Bullet delivers all those attributes wrapped into a very attractive package balanced by strong performance data and solid EPD's. His dam is a classy young Logan daughter out of the Typesetter/Pacesetter Dusty Cotton donor cow, who's full sibling sells as lot 47. When considering that Bullet Proof on the top side brings in even more proven genetics, it is hard to pass the opportunity to put a gentle young bull like this to work in your program.

These embryos represent the best Collier Farms has to offer. They will be full siblings to the lot 55 cow and the high selling bull in last year's Advantage sale. Never before have we offered frozen embryos from this mating. This is truly a rare opportunity to put more than one Logan by Bengal Baby individual in your herd.

Embryos are frozen Direct Transfer grade 1 quality and stored at Ovagenix in College Station, TX.

**Purchased embryos must be picked up by July 1, 2013 at buyer's expense or will be forfeited.**

# Collier Farms Advantage Program Information

The Collier Farms Advantage Program was designed for the primary purpose of expanding the marketing avenues and increasing the value of our customers' product. We understand the challenges of breeding, producing, and raising seed stock genetics, and also those associated with realizing the full value of those genetics in the marketplace. To better enhance the value and marketing options of our customers, we created a cooperator style system that allows users of Collier Farms genetics to participate in both our sales and developmental programs, as well as offering buy-back options.

Participation and use of the Advantage Program is easy and free of any long term commitments. Simply use any Collier Farms raised bull, female, semen, or embryos in your breeding program and the resulting progeny will qualify to be nominated to participate in any one of our Advantage events. The beauty of this, unlike other similar cooperator programs, is that the breeder has the option of participating at any time they like, without long term commitments or guarantees to consign. Of course, prior screening and advanced notice of intent to participate could be required.

## To better understand the Advantage Program, here is a simple Q & A that may help with inquiries:

**Q:** Do calves from any Collier Farms produced bulls qualify to be nominated to an Advantage event?

**A:** Yes, if your calves are out of a bull that you purchased directly from Collier Farms and you were the breeder of the calves, they qualify.

**Q:** Do calves from one of Collier Farms' semen bulls, such as Logan, qualify if they were produced by another breeder other than Collier Farms and consigned by someone other than that original breeder?

**A:** No, if the original breeder uses Collier Farms semen, they can consign that calf to an Advantage event, but a third party buyer of that animal cannot. Basically, no trader type cattle will be allowed, only the original breeder of the animal can nominate.

**Q:** Do semen and embryo progeny qualify to participate?

**A:** Yes, all resulting progeny from semen or embryos purchase directly from Collier Farms qualify to be nominated by the original purchaser and user of that semen or embryos.

**Q:** Do calves out of a Collier Farms raised cows qualify to participate?

**A:** Yes, all calves out of Collier Farms raised cows purchased from Collier Farms qualify.

**Q:** Do calves from all cattle purchased at an Advantage event, such as the female sale or Performance Bull Sale, qualify for the Advantage Program?

**A:** No, only those animals raised by and purchased from Collier Farms qualify to have progeny nominated to Advantage Sales. Progeny of cattle raised by other Advantage breeders do not qualify.

**Feel free to call and visit with Collier Farms about more information concerning the Advantage Program. We would love to have you as a participant in this premier program.**
